Cowardly Assault on Jack Jackson

Struck and Knocked Out, Then Robbed and Left Lying on the Road—No Clue to Thugs.

No clue has been discovered of the two assailants who waylaid Jack Jackson between midnight and 1 a.m. Sunday and slugged him near the tennis courts. The blow knocked him to the ground, and falling on the gravel, he sustained painful grazes requiring hospital treatment.

His own account of the affair is that he had remained down town till after midnight, and had been chatting on the corner at the Coleman cafe, watching cars coming back from the lake dance. Proceeding towards his home on Seventh street, he was walking along whistling to himself, and as he reached the corner building opposite the tennis courts, two men pounced out, and one hit him with a black-jack or a sand-bag on the left side of the head, rendering him unconscious for a few minutes.

He fell on the gravel road, and when he came to, found he had been robbed of over \$9. He staggered home, and his parents immediately telephoned Constable Antle, who immediately responded, and took Jackson to the hospital. He made a search for suspects, but it was unavailing.

Jackson could give no description of his assailants, as he was so completely taken by surprise, neither of the men speaking a word to him before slugging him, that he had no means of identification.

Mr. R. H. Melville, manager in Alberta for the Confederation Life Association, accompanied by Mrs. Melville, is spending a day or two in town, and visiting H. G. Charman, who has been here in the company's interests during the past two weeks.

Social Creditors met last evening for the purpose of re-organizing, but owing to the holiday season and the warm weather it was decided to defer re-organization till a later date.

Notice

All persons interested in selling tickets on the Chesterfield and bedroom suites, to be given as prizes at the monster carnival, Sept. 5 and 7, can secure them at McBurney's Drug store or from M. Stigler.

\$10 cash prize will be given to the person selling the most tickets up to Saturday noon, Sept. 5.

Rev. H. J. Bevan Inducted St. Paul's

Expressed Pleasure at Resuming Former Charge—Pays Tribute to Help of Mrs. Bevan

The induction of Rev. H. J. Bevan into the charge of St. Paul's United church was carried out on Friday evening, July 17, by Rev. John Wood of Hillcrest, chairman of Lethbridge Presbytery, and Rev. R. Upton of Bellevue, in the presence of the congregation.

In addressing the congregation, Mr. Wood stated he did not agree with the statement recently made by the Premier that 60 per cent. of church members are not Christians. There may be varying grades of Christians, some enthusiastic and sincere, others negligent of their obligations to their church. The older he grew, the less assertive he became, and a greater breadth of tolerance developed.

In his own church he found difficulty in getting people to come to the communion services, because they felt, in many cases, unworthy or not qualified to partake of the sacrament. It was not because they were not Christians.

He urged on the congregation the importance of being loyal to one another, and to the church and minister. Luke-warmness in Christianity will disappear if these qualities are practised. The church must also be aggressive, and not apologetic, for it had much to be proud of, and always had something to give for the uplift and progress of mankind.

Rev. H. J. Bevan, in addressing the congregation, stated that being inducted into Coleman church was becoming a habit. In 1926 he was first inducted here, leaving in 1930. He remembered when he first came, people would ask: "How do you like Coleman?" He liked the physical surroundings of the mountains, and considered it a privilege to serve here. He did not overlook the important part his wife played in his church work, and paid tribute to her help.

In looking back, on their second arrival here, they found many interesting things around the church which were here when he was minister in the earlier years. He and Mrs. Bevan had many reminders of their previous years of service here. In taking charge, he said the life of the church and all that pertains thereto would be the thing upmost in their lives. He would not impose on their patience or generosity, feeling that they were here to serve.

At an interval in the service Mrs. Bevan was presented by a beautiful bouquet of flowers by the Ladies Aid.

At the conclusion of the induction service, refreshments were served by the ladies in the club room, and a social half hour spent, during which Mr. and Mrs. Bevan renewed acquaintances with many members of the congregation and friends.

Danger of Forest Fires is Acute

Continued Dry Weather Increases Hazards and Gives Forestry Officials Anxious Time.

The last extensive conflagration in this district was in 1931, which required at times 800 men to combat it, and incurred an expenditure of over \$13,000 in fire-fighters' wages. There have been smaller fires since, but 1931 is well remembered for the anxiety and damage it caused.

Reference to Journal files of that time shows that on August 25, 1931, fire was spotted at 6.30 p.m. two miles east and south of Star Creek ranch. It was first seen from the highway west of town, when Forest Ranger Boulton was returning from fire observations at Corbin, B. C.

Men were immediately mobilized in Coleman, Salvador's truck taking out the first contingent of 15 men. At 9 p.m. the second crew were taken out, and cooks and equipment were moved out as it was anticipated there would be quite a long spell of fire-fighting. Fresh crews were recruited during the night to relieve those who had been on duty from the previous evening, and fire-fighting equipment was brought from Pincher Creek and North Fork ranger stations. J. P. Alexander, at the time supervisor of Crow's Nest Forest Reserve, took charge during the night, both he and Ranger Boulton visiting the various places where crews were established to combat the fiery onslaught.

On September 3 The Journal reported that the fires had been held in check in York and Star Creek districts, but shifting winds had added to difficulties. The fires had then been burning nine days, with Supervisor Alexander and Ranger Boulton working day and night keeping the campaign organized, and snatching an hour or two of sleep only when the winds calmed down. Over the week-end 250 more men were employed on various fire fronts.

On September 10 The Journal headlines announced "Heavy Snowfall Completes Battle With Fires—Two Weeks Unceasing Combat Brought to Speedy Close."

The news reports stated: Exactly two weeks after the outbreak of forest fires in the vicinity, during which over 300 men were employed in fire-fighting, a most afflating squelcher came with a rain and snow storm. Men from Camps 1 and 2 at York Creek and from camps at Star Creek and Glacier Creek, very quickly came to town on arrival of the snow. The boys will now be at leisure to enjoy a shave and a haircut, as several days in the woods gave them as shaggy an appearance as the bronchos running at large.

The fire cost approximately \$1,000 daily in expenses, besides which heavy losses were estimated in timber burned.

Hillcrest Carnival

Saturday and Monday are the dates of Hillcrest's fine monster carnival, which includes a picnic, baseball match and other sports, the particulars of which are given on large posters in town. On Monday evening a Chesterfield suite is to be drawn for. It is expected that many from Coleman will attend to show neighborly goodwill and help boost the carnival.

Result-getting advertising is a steady pull—not an occasional jerk.

Elks and Rink Company Carnival

On Saturday and Monday, Sept. 5 and 7, a combined monster carnival under Coleman Elks and Coleman Rink Co. will be held, and the main prizes to be drawn for are a 4-piece Chesterfield suite and a 5-piece bedroom suite, each valued at \$150. Tickets are now on sale for the prizes, which includes admission to the carnival.

First Aid Competitions

On Labor Day, in Bellevue, First Aid competitions will be held in which teams from all mining companies in the district will take part. W. E. G. Hall, district mines inspector, will be glad to furnish information.

Bank Loans For Wage Earners

In order to provide borrowing facilities for employed people, the Canadian Bank of Commerce announces the establishment of a personal loan service at its Coleman branch.

The bank emphasizes that it in no way desires to encourage people to assume unnecessary or burdensome debts, but it does feel that if and when the need to borrow arises through unforeseen emergencies, particularly in the case of sickness, dental bills, putting in the winter's supply of coal and other similar pressing needs, it can be of real assistance by lending at low rates and on a reasonable budget plan of repayment.

Mr. W. L. Rippon, local manager, will furnish details of the plan on application.

Airplane Lands on New Field

The first airplane to land on the government field west of town was that of Charles Tweed and C. F. Gibson on Sunday, when they took Major Hornby for a flight. It is probable they will be here on Sunday next to take up passengers for short flights.

HIS MAJESTY'S PORTRAIT FREE

Turn to Page 7 for particulars of special offer. A specimen of the photograph of King Edward is on view in Leduc's store, where cartoons may be obtained, the labels of which entitle you to a copy of the portrait free. Read the advt. and particulars.

Hospital Notes

Miss Helvie Hedburg is on duty as night nurse during the holiday season, while the regular nurses are taking their holidays in turn.

John Hopkins, sr., is steadily improving, and is visited daily by his grand-daughter, who helps to while away part of the visiting hours by playing cribbage or rummy.

Herb Snowdon, injured last week with a fractured pelvis, is resting comfortably, though it will be some time before he will be able to leave his bed.

Mr. Hilary of Sixth street is suffering from a bad attack of asthma, necessitating remaining in hospital for some days.

Mr. Kulig of Blairmore road is a patient, having been operated on. The men's ward is filled.

Shone Still in Running At Tennis Tourney

Dick Shone, playing in the provincial tennis tournament at Edmonton, was still in the thick of the fight at the end of Wednesday's play. Though defeated in the main events of the tournament, Dick is making good progress in the men's secondary singles and the Country Special. "Chick" Roughhead, it is reported, will represent the local club at the southern Alberta tennis tournament to be held at Lethbridge next week.

Dr. Lillie Cup Won by Bellevue Bird

Pigeon Derby From Peace River to Crow's Nest Pass Sets Local Record.

Pigeons of Pass clubs released at Peace River, 471 miles air line from Coleman, made the flight the same day they were released, which is a remarkable feat, and the first time this distance has been recorded in one day in local club annals.

Three lofts clocked birds the same day they were liberated, as follows:

C. Bogan, Bellevue, velocity 862.5 yds. per minute.

F. Glover, Bellevue, velocity 861.8 yds. per minute.

F. Beddington, Coleman, velocity 811.8 yds. per minute.

The distance from Peace River to Bellevue, home of the first two birds, is 477 miles. The flight was made on Sunday, July 5. Owing to heavy rains at Peace River, the birds were held over an extra day in the baskets, and when liberated the weather was reported "Cloudy with fair visibility."

This is the final race in 1936 for old birds.

Mr. W. H. Hunter, of Calgary, representing the North American Life, is in town for a few days.

NOTICE

The R.C.M. Police, Blairmore, requests that any person or persons, who had occasion to be on that portion of Highway No. 3 from Mohawk Mine Crossing to east of the old Burmis road on July 8th, 1936, between the hours of 5 p.m. and 5.30 p.m., communicate with local detachment at once.

DIXIE gives you a long cool smoke... And it's always FRESH in the plug.

Loans For Agriculture

Appropriate was the warning issued recently to investment companies and investors by S. P. Grosch, K.C., chairman of the Local Government Board of Saskatchewan when he told the Investment Dealers' Association of Canada in session at Jasper, Alberta, that they could not expect to be collectors alone, but must be prepared to continue to loan money.

At the same time, according to press reports of the convention, Mr. Grosch told the board of directors that they "must be quick to offer concessions and help in debt adjustment if investors are to retain their status and the protection they now have."

It is generally well known that many of the loan companies, if not all of them, have shut down on loans in the prairie provinces and particularly in this attitude applicable to loans to farmers. Where the security is ample and prospects of repayment on maturing dates exceptionally good the mortgage companies are accepting a limited number of "risks" in the cities, but little if any loan money is available to western farmers just now, no matter what their record, how good the security they have to offer or how excellent the character of the prospective borrower.

Thus the farmer and the agricultural industry generally in the west is in somewhat parlous condition when it comes to securing credit to make needed improvements or to carry on operations. It is true that there are governmental boards in existence for the purpose of making agricultural loans but these institutions have either no money available or such a small amount in comparison with the needs of the day that they are obliged to restrict their activities to a few select loans.

In the very few instances where mortgage corporations are prepared to advance money they are still insisting on a return of seven per cent. for their investment and this is a higher rate of interest than borrowers can afford to pay in the light of income from ordinary revenue sources.

It is admitted, of course, that there are two sides to this story as with most stories. Loan company managers say that as custodians of private funds they cannot afford to loan money in the prairie provinces at the present time and particularly they cannot afford to run the risks of making loans to agriculturists. They point to the past few years of combined general economic and agricultural depression, the latter resulting from drought, surplus stocks of wheat and low prices for agricultural produce as an excellent reason why they should keep their purse strings tightly drawn when the farmer asks for a loan.

But more particularly do they inveigh against what they regard as repressive legislation enacted by the several provincial governments as a potent reason for withholding credit from the farmers, legislation which has been placed on the statute books in the belief of the sponsors that they are protecting debtors at a time when they knew not which way to turn to escape from almost intolerable burdens.

Possibly the loan companies themselves are not altogether without blame for this class of legislation in at least some instances, if Mr. Grosch's diagnosis of the cause of it is correct, for he is reported to have declared his belief that "one of the chief reasons for placing upon the statute books legislation which limits the rights of loan companies is to be found in the fact that some companies have adopted an attitude of drift and desire to wait until something turns up, with the result that the debtor gets in touch with a member of the legislature and demands all sorts of drastic legislation against loan companies."

One cannot get away from the fact that in the past four or five years, because of depression, conditions and lack of credit, farm property has performed been allowed to run down at heels, due to the impossibility of renewing or replacing worn out equipment in anything like the degree necessary to continue to operate on an economic scale or to provide new implements to meet changed methods necessitated by changing conditions.

Almost every farmer knows by experience that this is the case and all he is unable to secure the necessary credit to enable him to replace the worn out tools of his trade and to purchase new equipment necessary for economic operation, the day when he is going to be able to pay his past indebtedness is further deferred and the loan company and the farmer alike suffer as a result.

Since the entire western country is still largely dependent upon agriculture for its future as well as its present welfare, it would appear to be good business for the loan companies to offer concessions in the matter of debt adjustment to a feasible limit and continue to loan money at a reasonable rate for agricultural purposes where the security is satisfactory. Such a course would appear to be in their own interests, in the interests of the clients whom they represent, in the interests of the farmers and in the interests of the country to do so.

Paid While It Lasted

"Washing" cancelled documentary stamps, worth from \$1 to \$20 apiece, and selling them again at full value to unsuspecting commercial houses, was a racket uncovered by Secret Service men in Boston. Stamp-collectors sold the stamps to the "washers," who were accused of doing the Government out of \$500,000 on stamps used for deeds and stock transfers.

The early Indians of North America made beads from the shells of clams, fresh-water mussels, and abalone, and used the beads as a medium of exchange. It was called "wampum."

Used Diplomacy

"Dearest," said the young mother, "I've decided to name our baby Samantha."

Disagreeing with her on the choice, her husband tried to solve the situation diplomatically. Finally, he said: "After all, that will make a fine name, dear. My first sweetheart's name was Samantha. I'm sure she'll feel complimented."

The baby was named Janet.

Junior: "What are distant relatives?"

Father: "They're the kind of people who call on you after making a long trip, and wish to avoid paying hotel bills."

Park System In B.C.

Acres Of Show Gardens Being Planned For Province

Six million acres of show gardens are being planned for British Columbia. Provincial and federal ministers are putting their legislative heads together to push immediate development of scenic parks in the coast province. Some are already well finished; others still a pencilled outline on the map.

Out of \$2,000,000 expected to go into public works this season, a sizeable lump will be used in grooming parks and building roads to make them easily accessible. The province, however, would hand over to the Dominion parks on which development has already started and concentrate upon new ventures, including the 3,000,000-acre tract named for Canada's governor-general.

At present the province looks after five of its parks and has mapped out four more for development. The Dominion has four more, completing a system that provides six acres of parkland for every inhabitant of British Columbia and more than half an acre for every person in the Dominion.

The 973 square miles of Garibaldi Park will be brought closer to trunk highways with completion of a \$6,000,000 suspension bridge spanning Burrard Inlet and joining Vancouver with its northern suburbs. Preliminary work on the giant bridge already has begun.

Up until now Garibaldi Park, cradled in the coast range, has been inaccessible to motorists. Game abounds in the timbered reaches, in the Alpine lakes and on the slopes of one of the volcanic mountains that rises to a height of 9,000 feet.

The province is keeping Tweedsmuir Park for its own. This, a vast garden that covers 3,000,000 acres of rivers, mountains and lakes, is largest of all. At present the untended acres are threaded only by trails. Development of roads will be considered under a public works plan carried out by provincial and federal governments.

Maple Syrup Crop

Quebec Produced Largest Quantity This Year Since 1932

One of this French-Canadian province's foremost industries, the maple crop, this year reached the bumper proportions of 1,581,600 gallons of syrup and 5,747,000 pounds of sugar, a major portion of which was shipped to the United States. The largest crop since 1932, the maple sap produced a revenue of \$2,267,300, as against \$1,911,000 in 1934.

More than 40 per cent. of Quebec's maple crop is annually bought by cigarette manufacturers in the United States, officials say. Meantime, French chemists are said to be experimenting on the possibility of using maple sap in the production of alcohol.

Roquefort Cheese

More Than 26,000,000 Pounds Are Manufactured Annually

More than 26,000,000 pounds of Roquefort cheese are manufactured annually in the picturesque French village. For more than 11 centuries this cheese has been manufactured on commercial basis, but Roquefort cheese, itself, goes back even farther in history, as it is mentioned by Pliny the Elder, who wrote in the early decades of the Christian era.

More than 200,000 persons, working on 25,000 farms, are employed and earn their living directly from the cheese industry. Milk is contributed by 700,000 sheep, tended by 10,000 shepherds.

Preferred More Dignity

Servants Of English Earl Did Not Like His Democracy

Many years ago we used to correspond with Auberon Herbert, the son of the fourth Earl of Carnarvon, who, although a vigorous opponent of socialism, was one of the most democratic of aristocrats. He was so democratic that he had on his servants sitting at table with him and his wife. His servants disliked his democracy so much that at the end of a week they gave him notice that they were going to quit.—The Argonaut.

Trying New Method

On three farms in Oxford county, Ontario, an experiment is in progress with a new method of preserving alfalfa. The crop is stored in the silo in green condition and treated with acid.

England has two of the fastest battle cruisers in the world, the Repulse and the Renown, each having a speed of more than 31.5 knots.

Clever Men Beat Bank

Worked New System But Were Subsequently Caught

This stunt was revealed by an official of an important bank, victimized by the perpetrators, who since have been arrested. Two partners, ostensibly operating a legitimate business, opened a check account and deposited \$10,000. Within three months they had increased the fund to \$32,000, making the deposits in person, and getting to know the bank tellers. . . . One partner then appeared, asking to cash a partnership check in the sum of \$29,458.27. The teller recognized the signature, okayed it, and then—as is customary—used the tel-autograph to ascertain whether a sufficient balance was on hand.

Simultaneously, the other partner appeared at another teller's window, adding to cash a \$29,458.27 check. This teller also used the telautograph, and the official upstairs wrote in reply: "Okay, okay. I told you it's okay." . . . The loss was more than \$27,000.—New York Post.

Eliminates Fire Hazard

Automatic Extinguisher For Airplanes Has Been Perfected

Fire is to be banished from aviation, according to British scientists who have been working for a long time on a new blaze-prevention system for airplanes. Reports received in London say an automatic fire-extinguishing arrangement has been perfected which makes it almost impossible for a machine to catch fire, either in the air or after impact with the ground. Extinguishers are fixed in vital parts, on the gasoline tanks, with jets leading to the gasoline pipes, over the engines. In the passenger cabins, automatic-operated automatic nozzles, and on the fuselage. They have spring-operated automatic nozzles which act if a bump exceeds the pressure at which the spring is set. Extinguishing the fire is sprayed over burning fire can start and no flames can survive the action of this liquid.

Hypnotic Suggestion

Lecturer Claims It Is Wonderful Help In Dentistry

Students of the Royal Dental Hospital in London have had their teeth cracked, chipped, filed and extracted, all without anaesthetics—and all without pain. It's done by hypnotic suggestion.

"There is nothing mysterious about it," claims William Lovatt, who is lecturing on "hypnotic dentistry" in several large London hospitals, "it is a perfectly natural process and in no way harmful."

A suggestive patient—and 70 per cent. are—has only to accept suggestions for anaesthesia and he can submit to the forceps or drill confident that he will feel nothing, either at the time or afterwards."

Experience with 5,000 cases, he says, has convinced Mr. Lovatt that the possibilities for hypnotism in modern medicine are enormous.

Lifted Tons Of Money

W. T. Dagger, of Blackpool, England, just retired from the Corporation service, has lifted over 300 tons of money in his 30 years of collecting from penny-in-the-slot machines. His collection, he estimates, has averaged \$90 daily in copper, or about \$675,000 in 30 years. As \$5 in copper weighs just over five pounds his aggregate collection totals 302 tons.

Snowshoes For Quints

The Dionne quintuplets will be able to waddle around in the snow next winter without sinking if Mike Lyons, of Clayville, New York, has anything to say about it, for he has constructed five pairs of snowshoes for the girls from Callander.

The hardest thing in making a speech is to know what to do with your hands.

Using New Ceremony

Dominions To Have Special Part In King's Coronation

The British Dominions will have a special part in the crowning of the King, a cable to the New York Times from London, said. It adds that following the coronation next May, King Edward VIII. will make a tour of the Dominions.

"When Edward is crowned in Westminster Abbey on May 12, 1937," it says, "Canada, Australia, South Africa and New Zealand will receive positions in the ceremonies emphasizing their new importance as self-governing nations under the Statute of Westminster, enacted since the last coronation."

"In accordance with this statute, the King becomes not only ruler of the British Empire as a whole, but separately and distinctly King of the Dominions. A new ceremony will be prepared stressing this conception of the King as the direct head of each Dominion. Through the Dominions Office conversations have reached an advanced stage regarding the exact part the Dominions will play. The crowning of the King in this new form will be the prelude to a royal tour of the Dominions."

SELECTED RECIPES

ROLLED NUT WAFERS

1/2 cup "Crown Brand" corn syrup
1/2 cup butter
1 cup bread flour
1/2 cup sugar
1 cup chopped walnuts, or peanuts

Heat the "Crown Brand" corn syrup to the boiling point, remove from heat and add butter. Then, slowly and stirring all the time, add the flour which has been mixed with the sugar. Now add the chopped nuts. Drop small portions from the tip of a spoon on a greased cookie sheet, 2 inches apart. Bake in a slow oven. These cookies can be rolled or just left plain.

Glider In Stratosphere

May Be Possible According To Tests Made In Moscow

Glider may be able to reach the stratosphere ere long, according to reports from Moscow. By a new method a glider may be towed to a great altitude, the towing wire then paid out until the glider is 6,500 feet above the towing plane. If a second glider is towed by the first and its line is paid out it can ascend above the first. Thus a plane flying below the stratosphere can, by this flying "chain" tow a glider miles above it. Gilding Master Venslav has been making the tests.

Faster Speaking

It is interesting to have the testimony of George Emery (who has written 150,000,000 words in shorthand) to the fact that people speak much faster than they did; the average increase he estimates at something like 25 per cent. The coming of the motor-car seems to have affected the national rhythm. Even much of the music we hear is taken considerably faster than the composer intended.—London Observer.

Not until 1870 were milk cows known in Japan. An American cow was imported at that time and two men, selected for their strength, were assigned the task of wrestling the milk from her.

Working On Anti-Fog Ray

Marconi Is Busy Trying To Perfect New Invention

Were Charles Darwin alive, he would not agree with the disparagement of the dank vapor which assails Great Britain mainly during cold weather, for the famous naturalist's delight of London was founded in a fog.

"He gloried in its 'grandeur,'" as he said, and always looked forward to wintering in the metropolis, attracted by the prospect of a smoky mist. Although the origin of the species of town fog is the deadly smoke, harbinger of ill health, the Victorians suffered these visitations with no hope of a "cure"; but today scientists are having promising results.

Recently there have been many attempts to find the best method, and the outcome seems to be that future research will be centred around the aeroplane. The basis of experiments has been to spray chemicals down on the fog, and the mist will vanish if sufficient anti-fog is used. Already headway has been made, but the drawbacks at present are the cost and lack of facilities, for a huge fleet of planes would be necessary to remove a yellow "peasoupier."

The most recent anti-fog developments promise to end all this fog, however; in the midst of "war-ray," talk and the "mystery beam," which detects enemy ships and hostile aircraft fifty miles away, comes the report that Marchese Marconi is perfecting a great anti-fog ray.

When, or whether, this ray will mature cannot be said; but it would appear that a definite fog-dispelling invention of wide application will be at hand. It may be a ray, a power, or chemicals. Everything depends upon the scientists.

Forgotten Eskimo

Scientists Will Search For Traces Of Civilization In Eastern Arctic

Traces of a forgotten Eskimo civilization in the eastern Arctic will be sought by a Dominion government scientist who left for the north on the Naropole, sailing from Montreal.

It is the annual patrol to government posts in the north with the holds of the veteran Arctic ship bulging with mail and supplies. In a 10,000-mile cruise that will take the ship within 800 miles of the North Pole, contact will be made with 35 posts.

Included among the passengers was Douglas Leechman, an anthropologist from the National museum, who will spend several weeks on the Duabon Islands, lying at the eastern tip of the Vagava peninsula.

In the far-eastern Arctic, tools of bone and ivory have been unearthed that bore no resemblance to those used by Eskimos in other sections of the north. Scientists believe they indicate a peculiar Eskimo civilization now extinct, which Leechman will try to trace. He will probe old village sites on the islands in the hope of finding some clue to the date and character of the ancient culture.

By improved technique, surgeons report that it is now possible to cut and lengthen bones so as to extend a shortened leg as much as five inches.

No enemies to forgive? Then pardon a few friends.

Appleford's
Para-Sani

You'll save its modest cost before half the time used. That's because this heavy waxed paper keeps left-overs fresh, moist and flavorful. Ask for Appleford's Para-Sani because of the exclusive knife edge cutter on the box.

New Criminal Code In Germany To Strike Down Opposition

Berlin.—Nazi authorities wedged sharp teeth Sunday in a new criminal code to strike down the underground opposition which still comes to light in hundreds of arrests and court sentences.

A special commission of jurists, charged by Chancellor Adolf Hitler with drafting the criminal code, was reported to have proposed a maximum penalty of two years' imprisonment for anyone "disturbing the peace" by wilfully distributing false reports.

Similar punishment was recommended for persons participating in movements inimical to the state. Secret police, fitted together in a sieve-like network that covers every inch of German soil, weekly lead many to jails and concentration camps. Most of them are charged with "plotting treason" or with having already committed treason—either against the Nazi party, the state or the German people. Bulking large among the arrested are men and women against whom blanket charges of "communism" are lodged.

Here are some accounts of arrests made and sentences received as reported in the Nazi press:

A 70-year-old resident of Gotha was sentenced to 15 months in prison for writing a letter to a friend in Switzerland in which he expressed himself freely against certain Nazi party leaders.

A Kiel professor was sentenced to two months in jail and fined 1,000 marks for "criticizing the form of the state in non-factual manner" for "maliciously putting doubts into the souls of his pupils."

During one of the recent butter and egg shortages a man in Heide, Schleswig, asserted that despite the shortage butter was nevertheless being delivered to party leaders. He was sentenced to 10 months in jail. The same Heide court sentenced two men to six months in jail for making jokes about the Nazis and meted out three months to another for criticizing.

Next Convention In West

Technical Agriculturists Will Choose City For 1937 Meet Later
Fredericton, N.B.—The 1937 convention of the Canadian Society of Technical Agriculturists will be held in a western Canada city to be named later. It was announced at the 16th annual gathering of the society. Announcement also was made of the re-appointment of H. L. Treuman of Ottawa as general secretary and managing editor of the C.S.T.A. Review.

Giant Artesian Area

Stretches In Ontario From Georgian Bay To Toronto
Toronto.—A survey of Ontario wells undertaken by the provincial mines department in conjunction with federal geologists and the Ontario Agricultural college, has revealed the existence of a giant artesian area stretching from Wasaga Beach on Georgian Bay to Toronto. Col. R. B. Harkness, natural gas commissioner, announced.

Grant For Fishermen
Charlottetown.—A combined federal and provincial government grant of \$50,000 is to be placed at the disposal of Prince Edward Island fishermen for rehabilitation purchases. It is announced here as appointment of a provincial fisheries board was made known.

New Party Will Not Contest The Quebec Elections

Montreal.—Paul Gouin, Action Libérale Nationale leader, in a statement here, announced his party will place no candidates in the provincial election field.

"L'Action Libérale Nationale was founded for two purposes: To adapt provincial legislation to present day problems and to endow Quebec with a national political aim," Mr. Gouin said.

"To accomplish this it was first necessary to overthrow the Taschereau regime. This task, a work of destruction, has been practically

Militia Changes

Many Units Will Be Wiped Out, Says Report

Ottawa.—The department of national defence made public a long list of militia changes indicating a vigorous house-cleaning was in progress among Canada's territorial troops.

Changes wiping out many units through disbandments and amalgamation were described as part of a plan to obtain better balance between the various arms in the non-permanent militia. Some of the units abolished were not organized and it was emphasized the changes have been in progress for several months.

Department officials declined to discuss reports the whole service was being modernized in accordance with resolutions passed in April by the Canadian Defence Association calling for greater mechanization, greater supplies of modern equipment and more frequent opportunities for officers to witness manoeuvres on foreign soils.

They said, however, no large equipment orders were being placed at present.

Reports met by silence have persisted for some time that the militia was being reorganized in conformity with plans in effect in the other dominions and the United Kingdom.

This year the department has disbanded three non-active cavalry units and caused amalgamation of eight others into four units, reducing from 35 to 28 the number of cavalry units in the country. It disbanded five field troops of engineers, reducing the total number to two, but authorized formation at Ottawa of the First Corps Field Survey company. Fifteen field companies and two fortress companies of engineers were left intact.

Scadding In Toronto

Says It's Great To Be Back Home Again

Toronto.—Alfred Scadding came home to Toronto with a cheery grin on his face. "It's really great to be back again," he said.

He came back to a mother who flung her arms around him and then cried as she saw his bandaged feet; to a group of overjoyed relatives and friends crowding around his stretcher and to a Dr. D. E. Robertson who had seen Dr. Robertson who had spent 10 days with him in the pit that was the collapsed Moore River gold mine.

Lemons From Italy

Toronto.—With music, songs and an impromptu parade, 100 Italian fruit merchants celebrated the arrival of five carloads of lemons, the first to reach Toronto from Italy since sanctions were imposed last fall. They paraded through crowded market districts singing "God Save the King," "O Canada," and Italian airs.

New Station For Callander

Callander, Ont.—So great was the increase of railway passenger traffic into Callander since the birth of the Dionne quintuplets, the Canadian National Railways built a new railway station. It replaces the old station, which consisted of two antiquated passenger coaches joined together and standing beside the track.

Strength Of British Navy

Adequate For Any Demand That May Be Made Upon It

London.—Winston Churchill, who as first lord of the admiralty set the British fleet in motion in 1914, told a crowd at Epping:

"I wish to make it quite clear that the royal navy is adequate at the present time for any demand that may be made upon it."

"It is incomparably stronger than any combination of navies which could conceivably be formed among the states of Europe."

Lord Strickland, a native of Malta and owner of newspapers there, demanded in the house of lords that the government "let us have poison gas by the ton stored in Malta."

By this means, he declared, the Mediterranean island would become a base "so strong in defence and counter-attack that there would be no war."

Collections Show Increase

Income Taxes For Federal Government Make Record

Ottawa.—New records in income tax collections are being made by the federal government. Collections for the first three months of the government's fiscal year totalled \$66,134,762, an increase of \$11,570,152 over 1935 figures.

The same upward trend was shown in collections of customs duties, excise taxes and duties. In the three-month period, customs duties less drawbacks, stood at \$20,053,396, an increase of \$1,475,846. Net excise taxes totalled \$28,406,619, an increase of \$4,244,978. Excise duties, less refunds and drawbacks, totalled \$11,215,376, an increase of \$2,014,041. Sundry collections decreased \$5,760 at \$180,926.

Buying More Gas Masks

British House Of Commons Asked For Additional Grant

London.—Great Britain has bolstered her air raid precautions. A supplementary civil service estimate filed in the House of Commons asked an additional \$4,250,000 with which to purchase gas masks.

Of this amount, \$125,000 was earmarked for the purchase and adaptation of two factories producing masks in the Manchester area. An additional \$25,000 was allotted for the civilian anti-gas school.

Entertains Legion Officials

Advance Party Guests Of Hon. Vincent Massey In London

London.—Members of the Canadian Legion official party, advance guard of 6,000 Canadian war veterans and others who will be at Vim Ridge July 26 for the unveiling of the Canadian memorial, were guests on July 14 of Hon. Vincent Massey. The Canadian high commissioner's reception in effect was a reunion of Canadians in London.

BRITAIN WITHDRAWS EXTRA SHIPS FROM MEDITERRANEAN

Now that the apparent crisis in the Mediterranean has vanished, several British warships have been withdrawn from the area, but in future the strength of the Mediterranean fleet will be kept higher than before. Reports from various sources intimate that Great Britain is fortifying an emergency route to the East which will be around the Cape of Good Hope. This route is not dependent upon such bottleneck navigation routes as the Strait of Gibraltar and the Suez Canal.

TO ATTEND CONFERENCE

Denton Massey, one of the young members of the Dominion House, who will represent Canada at the World Youth Conference in Geneva in September.

End Of Drouth

Chicago Man Predicts End Of Hot, Dry Weather

Chicago.—An immediate end to the drouth, with its crop ruin and threats of rising food prices, was forecast by the man who predicted the hot, dry weather six months before it arrived.

There would be "no more damage from drouth," he asserted, although it might take the country 10 days to accept the fact. By the end of the month, he added, there would be so much rain that "everyone is going to see that the drouth danger is ended."

The man was Seby Maxwell, astronomer-meteorologist, who said he read the good news in the wobbles of the moon.

Maxwell predicted the drouth's end with the same air of confidence with which he warned of its coming around Christmas time in 1935. At that time, he glanced, at his long range forecasting charts—based on the distances the moon wobbles in its orbit—and predicted:

"That January and February would have heavy snow, and that drouth would develop during March, April and May and do its worst in June and July."

Premier King Officials

Lays Corner Stone Of New French Legation In Ottawa

Ottawa.—Premier Mackenzie King laid the cornerstone of the new French legation here on Bastille day, July 14, the national holiday of France. It will stand on the high cliffs of the Ottawa river below the research council building and the bureau of statistics.

Representatives of foreign nations looked on when Raymond Brugere, French minister to Canada, referred to the many ties binding his country to Canada.

Relief Camps Will Not Be Re-Opened Hon. Rogers States

Ottawa.—Relief camps for transient unemployed will not be re-opened next winter if the government's present intentions are carried out, Hon. Norman Rogers, minister of labor, declared.

In a joint interview in which he was associated with A. B. Purvis, chairman of the national commission on employment and relief, the minister declared if there was a necessity for further care of single unemployed he would prefer to follow the English system of training camps.

Mr. Purvis stated a re-registration of unemployed on relief will be started in August and completed as quickly as possible so the commission may obtain a true picture of their employability and the geographic distribution of the various classes of workers.

Only those on relief rolls will be included in the registration, but Mr. Purvis stated interests of those who by increase of their initiative, and by sacrifice, have been able to avoid applying for relief, will be kept very much in the minds of the commissioners.

It is the hope that by co-operation with local advisory committees, to be set up shortly, the commission will ultimately obtain also an accurate survey of those unemployed whose names have not appeared on relief rolls.

Set up by authority of a statute enacted at the last session of parliament, the commission of seven members has been actively engaged the past six weeks in three main branches of activity—organization, arrangements for re-registration of those on relief, and preliminary examination of re-employment avenues. Creation of local advisory bodies will be carried out as soon as the national advisory committee is organized, which will be in a matter of weeks, Mr. Purvis said. These local committees will be set up in as many communities as the need indicates. Once they are functioning the larger question of seeking co-operation of employers will be entered upon.

Provincial governments each will appoint a registration officer who will come to a meeting in Ottawa where the questionnaire will be prepared and details of the registration completed. Once the plans have been completed, provincial officers will organize for the registration of each province, sending the cards to the national headquarters in Ottawa.

In the meantime each member of the commission has been assigned particular branches of potential employment for study and report, with particular attention being paid to housing.

Cards to be filled out with respect to each relief recipient will call for exhaustive information as to the number of employables in each fam-

ily and the class of work they might be expected to perform, as well as their past employment record.

Whether training schools will be necessary will depend upon the number of skilled workers disclosed in the ranks of the unemployed. It is considered possible, Mr. Purvis said, that the concentration of unemployed in urban districts may result in lack of available workers in certain areas and the necessity would then arise to move men to points at which work is available.

The commission has arranged to keep a constant card index of those on relief and for this purpose re-registration may be carried out twice a year, through co-operation with local advisory committees. These committees also will pay particular attention to the problems of those out of work but who have managed to maintain themselves without recourse to the authorities for relief.

"We definitely do not intend to re-open relief camps next winter," Mr. Rogers declared in reply to a question. "We will exhaust every alternative before we resort to that," he added, "and if it is necessary I would prefer the English system of training camps." It would cost \$2,000,000 to maintain the camps with an average population of 15,000, he said.

Inaugurating Air Service

Imperial Airways Directing Trips From Bermuda To New York

London.—A weekly air service between Bermuda and New York will be inaugurated during the coming autumn, it has been learned.

The service will be directed by Imperial Airways, subsidized with a capital grant of \$34,500 (about \$172,500), to provide a flying boat similar to the type intended for main airline routes of the same company.

Also there will be an annual maximum subsidy of \$18,000 (\$90,000), to which the Bermuda government will contribute \$3,500 (\$17,500) for five years. Otherwise the subsidies will be paid by the colonial official.

Indians Hold Sun Dances

In Attempt To Bring Rain To Alberta Reserve

Calgary.—Sun dances, originally designed by the Indians to appease the all-powerful sun and provoke rain, have been held at the Stony Indian reserve, near Morley, 60 miles west of Calgary, as the worst drouth in 45 years withered vegetation and dried up streams and springs. Participants included 90-year-old Joshua Twin who declared present drouth conditions were the worst in nearly half a century.

Attempt Is Made To Endanger Life Of King Edward

London.—The stately pomp of a ceremonial military procession along Constitution hill was interrupted dramatically when a stocky, club-footed man in his 30's pressed through the crowd and aimed a revolver at the king.

The revolver, which was loaded, was knocked out of the man's hand and fell in the roadway beneath the feet of the horse which His Majesty was riding.

While the man who held it was seized by police the king calmly ahead as if nothing had happened.

A woman in grey, whose name was not made public by the authorities, was the heroine of the occasion. She knocked the revolver out of the hand of the would-be assailant and sent it spinning to the ground.

Police closed in promptly and seized the man. He was identified as George Andrew McMahon, a stockman, aged about 34, who has lived in London for many years.

McMahon, described as a journalist, was arraigned in Bow Street police court before Sir Rollo Campbell Gray. He was charged with unlawful possession of a firearm with intent to endanger life, and remanded for eight days.

Reuters learned that McMahon's real name was Jerome Bannigan.

He was born in Tyrone, Ireland, the agency stated, but since youth had lived with his parents in the Govan district of Glasgow.

The whole incident was over so quickly few of the thousands in the crowd knew what had happened. But the story quickly spread and consternation was felt throughout London and the entire country. Newspaper stands were rushed by eager crowds seeking to learn the latest details.

The king himself was the coolest person in the hectic excitement. He gazed steadfastly into the crowd at the point where the commotion occurred. When the revolver spun through the air and landed beneath his horse's head he bowed.

McMahon was sentenced to a year's imprisonment in May of 1933 for allegedly libelling the police. But he won an appeal and the conviction was quashed. Until recently it was supposed he was editing a paper called the "Human Gazette."

The apparent attempt on the king's life came just after the cavalcade had passed under the Wellington arch at the top of Constitution hill. Nearby spectators heard a scuffle at the back of the crowd. Then a revolver, gleaming in the sunlight flashed through the air and fell to the ground beneath the feet of the king's horse.

Cash

IT was very early in the history of EATON'S that the principle and practise of buying and selling for Cash only was laid down. With certain exceptions we shall mention later, this is still the EATON way of doing business.

Today we still pay cash ourselves for our purchases, because by so doing we are able to buy to the very best advantage. And we confine our selling activities largely to the same basis for exactly the same reason—because Cash Merchandising offers the customer the lowest possible pricing on whatever she buys.

On certain items of furniture, furnishings and other equipment we do, as a convenience to customers, offer the terms of the EATON Budget Plan. But the Budget Plan prices are higher than the Cash Prices. They have to be, because it does cost more to sell merchandise "On Time." The alternative of paying Cash is always offered, however—and there is always a worth-while saving when you do!

NOTES AND COMMENTS

PASS TOWNS should keep urging on the Highways department, through their Social Credit member, E. O. Duke, the urgent necessity of surfacing or oiling the highway from Coleman to Bellevue. It is a stretch used primarily for business, every day, therefore should be surfaced before less frequented areas. Persistency in presenting this demand to the provincial government is the only way in which action may eventually be secured.

THOUGH we have experienced warm weather during July, people in the mountains have been fairly comfortable compared with those living on the plains. When you look at a thermometer, and it registers 100 in the shade, you immediately feel several degrees warmer. It calls to mind a tale of Klondike days. A summer visitor asked how cold it got up there, to which the old-timer replied that they never did know how cold it got till they had thermometers. They just went on working. But after thermometers became common, they figured that when it got to more than 40 below, it was too cold to work, so they quit for the day or as long as the cold spell lasted. It is often a fact that you do not realize it is as warm or as cold till you consult the thermometer. It brings to mind the proverb, "Where ignorance is bliss, 'tis folly to be wise."

THE DROUGHT has created a very critical situation for the ranchers and farmers, the only redeeming feature of which is that those who have grain to sell in more favored districts will get a good price. Peace River district is reported by the provincial department of agriculture to have splendid crops, a happy contrast compared to southern Alberta. Though drought does not affect directly a mining area such as this, the effects are felt throughout the year, as there is less grain to be forwarded to seaports, and less freight to be brought back by railroads. Man cannot live to himself alone, and all are in great measure inter-dependent. Our steam coal output depends largely on the volume of railroad traffic, which again depends on grain movement to a very large extent. When you knock a few cogs out of a gear wheel, the machine is temporarily crippled. Knock a few cogs out of the wheels of trade and commerce, and business in general is slowed up.

POLICE DUTIES again are brought to the fore by a letter in this issue, in which it is pointed out that it is the council's duty to provide more adequate protection for maintaining law and order, particularly during the night hours. One policeman cannot work 24 hours, and rowdiness runs rampant if not checked. The only remedy is a good strong-arm night policeman who will hew to the line, let the chips fall where they may. The R.C.M.P. will not do police duty in the town, as they are not engaged for that work. The onus is on the council.

AS well known as the famous battle cry of the Social Creditors, "O God Our help in Ages Past," is "The ushers will now come forward and receive your offerings." These words are known throughout the length and breadth of Alberta, yea, even down into the United States of Montana and North Dakota, and all the plains beyond the 49th parallel.

IN SUCH WARM weather mental processes are slowed up, the desire being to find a cool spot "and there let me rest." Fortunately the office in which we work is about 20 degrees cooler than outside, and we haven't air-conditioning equipment either. In such a comparatively cool atmosphere we should go about our daily pursuits in the ordinary way. But another difficulty faces us, maybe imaginary. To make this column of interest, we usually fall back on current events to comment on. But this week there does not appear to be a current local event of sufficient importance to stir up interesting thoughts. It reminds us of the problem of trying to make bricks without straw, though just what part straw plays in bricks we must confess to have little knowledge. However, material is scarce, accentuated doubtless by a lazy mental attitude caused by the extraordinarily high temperature.

BUT like the parson who is looked upon to deliver his weekly sermon, the show must go on, and the readers of this column must not be let down. Thus far we have been just sparring around, as it were, in the hope that a bright thought would scintillate and inspire us to write something of real interest. But inspiration cannot be forced. It just naturally comes, you can't describe why. Try as you might to conjure up something from the dim recesses of your mind, you have to bluntly admit on occasions that you're "stuck." If we continue sufficiently on this line of thought, we will have the column filled, and that will at least prove that we have honestly tried to perform our duty, and satisfy the mind of the compositor who has been worrying us how we are going to fill the hole in this paper.

Local News

Everett Price of Trail is visiting at his home here for a few days.

Coleman football team were beaten 3-1 by the Michel eleven at Michel on Sunday.

Mr. and Mrs. Alex Muir and family of Alexo are visiting Mr. and Mrs. Robert Gillies.

Mr. and Mrs. W. H. Haysom, and sons Hubert and Alwyn, and Miss Wilma Halliwell, motored to Banff to spend the week-end.

Mr. and Mrs. R. Carson of Brandon were here this week, visiting Mr. Carson's father, Mr. G. R. Powell.

Mr. R. C. Craig, superintendent of the power plant at Crow's Nest Lake, and Mrs. Craig and daughter will spend their holidays at Coeur d'Alene, Idaho.

Mr. Arthur Reid and son Harold left on Wednesday for two weeks holiday in Vancouver, they making the trip by automobile.

Mrs. R. M. Dunlop, who has been visiting her daughter, Mrs. Gillis, and Dr. Gillis, at Merritt, B. C., is visiting Vancouver Island before returning to Coleman.

Every business or professional man needs a typewriter, and the most convenient and serviceable is the Remington Portable at \$60 cash or \$65 on monthly terms. For further particulars apply at The Journal.

Rev. H. J. Bevan was greeted by a fairly large congregation at his first service on Sunday morning following his induction on Friday evening. The extreme heat cut down attendance at most of the church services.

Miniature turtles were received by several young people as souvenirs of Vancouver's Jubilee, sent to them by relatives visiting at the coast. To add to their interest to the young folks, their names were painted on the backs of the turtles.

Mr. and Mrs. L. A. Caroe and son Lawrence, accompanied by Miss Hilda Harbak of Provost, motored to Waterton for the week-end. They were joined on Sunday by Mr. and Mrs. J. Atkinson, both parties returning home together that evening.

Mrs. Cornett, writing from Vancouver, where she is spending a holiday, states she had just finished reading the Coleman Journal, noting all the items of local interest. She was leaving for a few days holiday in Victoria, and stated the weather was fine at the coast.

Mrs. William Oakes of Blairmore, and Mrs. Bates of Nelson were visitors at Mr. and Mrs. W. Lees this week.

Mr. Tom Flynn, well-known fire boss at International mine, will leave on Saturday for his annual vacation at Vancouver and Victoria.

Mr. and Mrs. Arthur Jones and Alf and Ronnie spent a holiday at Waterton Lakes and on Monday attended the exhibition and stampee at Lethbridge.

West Coleman's swimming hole in the river is a popular place for young and old during the hot days, while the swimming pool across the tracks remains empty.

Mrs. J. Emmerson, who since March has been in England, left on Saturday last by the "Duchess of Bedford" and is expected in Coleman by the end of the coming week.

John Graham's sixth birthday on Wednesday was celebrated by the holding of a picnic at Crows Nest Lake, to which several of his young friends were invited, and all had a glorious afternoon.

It is interesting to note that the announcement board on which is painted the hours of service at St. Paul's United church, still bears the name of Rev. H. J. Bevan as minister, though it is six years since he left here till he resumed charge last week.

Council Should Provide More Police Protection, Says Correspondent

The Editor:

Dear Sir:—Following the town council report in your last issue regarding the Italian hall, I beg to state that so far no disturbance of any kind ever took place in the hall. The council admits in your paper that the noise came from cars parked in the neighborhood, and further that if this noise doesn't stop that the license for dance purposes be refused, which I take it, means the license may be cancelled.

I wonder why the council takes the line of least resistance and threatens to close the hall, which is conducted honorably, instead of taking the bull by the horns and stopping this night nuisance by more night policing.

What authority does the council think that the management of the Italian hall or any other hall has to stop disturbances on the streets of Coleman. Certainly the council does not expect a dance committee to also act as police on the streets. It has always been my ambition to see that everything Italian in this town is carried on second to none, in so far as respecting the laws of the country, and in this case I believe that if anything is lacking towards having peace and quietness at night in this town, it is not to be blamed on the citizens or organizations, but on the council alone.

Thanking you for this space, I am, yours very truly,

J. S. D'APPOLONIA.

The product that is advertised in The Journal is worthy of your confidence.

At a meeting of the football club on Tuesday evening it was decided to enter the cup ties which will commence in the near future. Four junior players will be given positions when the team plays at Hillcrest next Saturday.

TRY LIVING TODAY

Men who gamble for wealth often seek to justify themselves by the argument that wealth will bring happiness to their wives and children. This isn't true. Wealth and poverty are equally likely to prevent real living. The happiest people are those with enough money to live on and enough wisdom to use their money for that purpose.

A great many of those who answered the query as to what they lived for, said that they were "just waiting to get money enough to travel." Yet the people who have travelled more than any other family I know have no money at all. They like to travel, and so they travel.—William Moulton Marston in Cosmopolitan.

A motorist rapped at St. Peter's pearly portal, and, gaining entrance, St. Peter pointed out to him thousands of miles of golden pavement.

"Fine, beautiful highways, St. Peter," said the man, "but where are the automobiles?"

"Well, my dear motorist," said the gatekeeper, "I'm sorry to say you'll find all the automobiles below."

"Tough!" pouted the motorist, "but I'll stay with my car."

Before long he faced Satan at the other gate, within which were parked a score of high-powered autos. "Great!" he remarked. "Which one is mine?"

"Take your choice," smiled Satan. He rapidly selected an attractive roadster and climbed behind the wheel.

"This is fine, Satan, now which way do I go and where are the roads?"

"There ain't any," remarked Satan, "That's the hell of it."

NOW A NEW BIGGER BAR

MORE SOAP AT NO EXTRA COST

The new Sunlight Soap—is the same pure, quick-dissolving soap that has lightened the wash-day burden of millions of housewives... the only soap with a \$5,000 guarantee of purity... easy on the clothes and hands. Ask your dealer for the new, larger Sunlight bar and save money.

Now a bigger bar in a single carton. The 4 small bars in one carton will no longer be obtainable.

IMPARTIAL AS LIGHT

YOU cannot argue with light. It just shows you things as they are. It plays no favorites. It gives brightness to the things that are already beautiful and it floods revealingly into the dark corners to show the dust and the grime and the hidden ugliness. If you guess at the nature and quality of things that are only half seen, if you see things that are not there, your eyes and your imagination are to blame. You cannot blame the light. For it can only illumine the aspects that are turned towards it.

NEWS is like light. It sheds a beam on men and events. It lifts the darkness from promotions and policies. It penetrates to hidden things and shows the truth as it is, for all to see.

THE news columns of a good newspaper are impartial. They tell the truth as it is found, they give all the facts that are known. The same news that guides its editorial opinions is there in full to inform your own judgments. It is the chiefest function of a reputable newspaper to bring everything of importance to the people into the daylight of publicity, discouraging vice and corruption and chicanery.

The independent newspapers of Southern Alberta shed the light of truth on the happenings and developments that interest you. Read them, confident in their integrity.

Two hundred persons who were mentioned in the king's birthday honors list on June 23 were received by His Majesty on July 14.

Hon. J. E. Michaud, minister of fisheries, left for the Pacific coast on a study tour of the British Columbia fishing industry.

Pan American Airways was reported to be preparing to start carrying the first paying passengers across the Pacific in its big clipper ships.

Dawn to dusk flights across the Caribbean Sea, putting parts of South America within 24 hours of New York and Chicago is now in effect. Pan American Airways announces.

Prime Minister Baldwin told a large deputation from both houses of parliament that he could not at present promise to initiate any legislation for reform of the house of lords.

Construction of the Bank of Canada head office building will start next spring, it was announced at Ottawa. The building will be four or five stories high and will cost at least \$500,000.

To be prepared in the event health insurance is introduced in Ontario, the Ontario Medical Association is working on a plan to determine cost of administration. Dr. W. K. Colbeck, president of the association, said.

Concern over the divergent foreign policies of Great Britain and the dominions was expressed by Lieutenant-Commander Reg. Fletcher, Labor, who asked the government to call a conference of the members of the British Commonwealth to outline a common program.

An exhibit of Canadian prize wheat grown by Herman Treble of the Peace River district, was officially opened at Stanley park by Mayor G. McGeer as the latest addition to Vancouver's many golden jubilee attractions.

King Edward turned over the proceeds of the sale of the gear and fittings of his late father's yacht Britannia, amounting to \$5,000, to the lord mayor of London as a contribution to the King George memorial fund.

After Many Years

Man Paid Back Money Which Lender Had Forgotten

Robert Sturges, optician of Troy, New York, said his faith in humanity is justified. Nine years ago a man came into his business office and was fitted with glasses. Three weeks later he came back to borrow seven dollars to get a third pair of glasses. He proposed to repay the money at the first opportunity.

Just recently a stranger walked into the store and told Sturges, "I've come to pay you back the money I borrowed." It took a lot of explanation but finally Sturges recalled the loan.

House Trailers De Luxe

Have All Comforts Of Home And Being High Price

House trailers for motorists have become so popular that there are 250,000 of them in use and they sell as much as \$14,000. These de luxe models have all the comforts of home, including mahogany paneling, separate beds for six, electric light plant, electric refrigerator, hot and cold running water, ice water, insulation from the heat and cold, telephone connection with the driver and even air conditioning equipment.

Not Much Of A Bargain

A. Balboni of Los Angeles loves a bargain. When he had a chance to bid in 30 pairs of shoes at an Army goods auction for \$15, he seized it. Then he discovered that he had been bidding on 630 pairs—all in one lot. Balboni took them home. The first crate was all size 14, so was the second and the third. Balboni wears size 8½. "What can anybody do," he asked, with 630 pairs of size 14 shoes?

The nine-hole golf course at Windsor Castle is being extended to 18 holes and the islands are being made more difficult as part of the alterations ordered by King Edward.

Pioneer Of Western Canada

Oldest Man In Saskatchewan Dies In 106th Year

Murdoch McLean, Saskatchewan's oldest man, died at the farm home of his son, John, in Moosemin district, Saturday, July 11, in his 106th year. Born at Loch Torridon, Scotland, Feb. 20, 1831, he emigrated to Canada while still a young man. He married Annabel McKenzie 52 years ago, and settled in the town district southwest of Moosemin, one year after the wedding. Thirteen years ago he lost all his possessions in a fire. Shortly after he retired and moved to Moosemin. Last year he and Mrs. McLean took up residence with their only son on his farm near town. Though his eyesight and hearing had failed in recent years, he took a keen interest in national and local affairs up to the very end.

In the old land Mr. McLean was a fisherman. Born during the reign of George IV., he lived during the reigns of William IV., Queen Victoria, Edward VII., George V., and at the time of his death was a loyal subject of Edward VIII. He was a life-long adherent of the Presbyterian church, and at the last election cast his vote for the Liberal party. He neither smoked nor drank.

Ministry Of Sports

National Sports May Be Under Government Supervision

An act to create in Canada a ministry of sports likely will be brought down at the next session of parliament, according to a statement by Hon. C. G. Power, minister of health.

The question of a national sports directorate under government supervision has been discussed at Ottawa for some time, the minister said. It was first mentioned by Tommy Church, Toronto M.P., the idea presumably being born, Mr. Power said, out of the troubles of the Canadian hockey team at the winter Olympics.

Another Toronto member and a former Olympic hockey star, Hugh Plaxton, has a bill prepared for the next session, providing for an act of parliament, bringing all amateur and professional sport under the ministry of health, Mr. Power stated.

Long Electioneering Trip

Musher Stakes 5,000-Mile Tour Seeking Auditor's Job

Alexander Malcolm "Sandy" Smith, noted northland musher and explorer, began electioneering over a balliwick averaging one voter to 11 square miles. He set himself a 5,000-mile tour over the territory in Alaska.

Smith, who was with the Wilkinson Polar expedition and who won a medal for rescue work in Hudson Bay territory, is an independent candidate for territorial auditor.

On his tour he will make use of almost every form of transportation known in the north—airplane, dog team, raft, automobile and boat.

A Family Heirloom

Lunch-Basket Made In Germany Is 150 Years Old

A family heirloom, 150 years old, in the form of a lunch-basket of a type still used by fishermen in the countries bordering on the North Sea, has come into the possession of Mrs. Charles Ross, Prospect street, Tilbury, Ontario.

The basket, which has been handed down from generation to generation, was made in Germany, the home of her ancestors, and is almost perfect condition.

It is made of straw, firmly woven, stained and varnished and has a cover joined to the basket with straw hinges.

Dr. Arthur H. Compton, University of Chicago savant, suggests that cosmic rays do not come from far off space, but from the earth's own atmosphere, many miles above our heads.

The Duke of York was installed an affiliated member of Glamis, Forfar, Monmouth Lodge by James Beattie, the village postman, who is a Right Worshipful Master of Glamis Lodge.

As it ages, brick mortar becomes harder.

Assisting Nature

By JACK MINER

Jack Miner, the Canadian Naturalist, sets out in this article the fact that man has, "Dominion over all." During the past year I have read a number of articles, both in magazines and newspapers, as well as many letters that have come to me, on the subject of "Nature's Balance," decrying actions or systems on the part of man which the writers described as "interfering with Nature's," "Upsetting Nature's Balance," and so on. To all who adopt that attitude I should like to put myself on record to the effect that, personally, I believe the so-called "balancing" of Nature was left entirely with man, and that I believe in assisting Nature for the benefit of humanity. God created everything, every thing, and then He created man. In His own likeness and gave him dominion over all; that is, as I understand it, the power and authority to manage everything here on earth.

Look, for instance, at the animal world, with the live stock in the farmer's barnyard as example. Did God create the Jersey cow, and the Holstein, and the Hereford? No. He gave man the original stock and then God, through man's instrumentality, developed many breeds, some for the high cream content of their milk, some to produce the greatest quantity of milk, and some as the best beef cattle. All have been on earth a long time, of course; but their differences are the result of man's management. And, remember, man has to interfere with Nature to develop them.

Much the same thing is true of the horse world. The strains being cultivated for particular purposes, such as the Clydesdales and Percherons for heavy draught work, and the blue-blooded descendants of original Arab stock for racing.

Recently we saw in the southern United States, where the character of the farm work to be done is too heavy for the common horse, yet where the climate is too warm to permit of the horse doing its best. In that part of the continent, therefore, man has crossed the ass with our common horse and produced a beast that withstands the heat and is also strong enough to do the work of tilling the soil. Yet he has developed the mule. But the mule kicked and, so far as I know, has gone no farther.

In poultry, if you trace back the various species it is very easy to see that it has been the work of man that has developed the different breeds. Leghorns, Brahmas, Minorcas, Plymouth Rocks, and so on, some of which are especially valuable as layers and others as food. Our much-prized turkey is nothing more nor less than the wild turkey, domesticated and improved.

Seventy-five years ago our Canadian North West was grazed by millions of wild buffalo. Then came the white man who, realizing the value of the fertile soil, established a park where the herd was to be preserved. The species was exterminated, slaughtered the great roaming herds and, turning the land upside-down, made it into one of the largest and most valuable of earth's great wheat-fields, with towns and cities and sturdy governmental buildings dotted here and there across its vast expanse. Remember, though, that in order to bring into this state of things, man had to "interfere with Nature" as some would call it.

And speaking of wheatfields, wheat has been man's favorite food for centuries. Yet wheat, even as it was being grown in Canada in comparatively recent years, had certain weaknesses. It had a hard husk, and the fall did not always survive the severity of the western winter. It was not produced in abundance as seemed desirable; it did not mature rapidly enough always to escape the ravages of early autumn frosts. Then came the man who was to do for our aid such men as Professor Charles Saunders, now Sir Charles

THE WILSON FLY PAD CO., HAMILTON, ONT.

Saunders, cerealist, of Ottawa, and by study, experimentation and the rigid selection of choice grains, developed a wheat that could be planted in the spring, that would yield several bushels more per acre than had been the rule previously, that would mature in a short period of time, and that yet retained all its former qualities. We have today the Marquis and the Garnet and other species of wheat, developed by God created the original, the germ; but man was given, and has used, the power to develop, manage and control it.

Or if you will consider your flower garden, look at the Iris. Gave gave us in America a little, insignificant flower growing along the banks of streams, which we called, commonly, the "flag." From it man has developed Irises that grow three or four feet in height, varied in color, and some giving out an exquisite fragrance. But man had to interfere with Nature to accomplish this. Or take the rose. Did God create the American Beauty rose? No. He gave man brains, and a little old wild rose which served as the germ, so to speak. Today, through the efforts of outstanding botanists, man has been given roses of beauty and fragrance, as the Creator intended should be done.

But let us look at another side of the question. At the same time that God created the little wild rose, He created also the very typical weed which is the Canadian Thistle. Still He gave to man the brains and the means of controlling these also, so that they may be restrained from predominating the plant world.

If you are raising poultry, or other life, valuable to man, you will have, owls, weasels and other vermin begin to destroy and live on the birds, and you fall to take a gun and shoot them. Then you are not using the brains God gave you.

As for me, I thank God for Him made for the raw materials He gave us with which to work; that He made us in His own likeness, after His own image, and endowed us with sufficient brains to develop those raw materials and keep on discovering and bringing within reach of us all the blessings He created.

Not Done In England

Ladies Do Not Wear Hats In Hotel Dining Rooms

"You can't wear that hat here!" said the head waiter at one of London's most fashionable hotels. Hedda Hopper, American actress, reputedly one of the best dressed women in Hollywood, looked up in astonishment. "Why not?" she demanded, hastily feeling the offending bonnet to find out if something had gone askew. "It isn't done—not in England," said the arbuter of decorum. "No hats in the dining room." "It's silly," she said, afterwards. "Hats are the rage or coming in America. They're bound to be here sooner or later." But Hedda had to take it off.

Bees don't whine; they hum while working and how they co-operate! Result, honey.

Bright Crochet For Any Room

Household Arts by Alice Brooks

Use Your Scrap of Wool

PATTERN 5544

Take stock of your rooms. Are there dull spots that might be brightened with a colorful rug, footstool or pillow? Here's an easy way to crochet all three in rug wool, rags or candlewicking. Do a number of the sturdy, waxed medallions, their flowers all colors against a uniform background. Join them, and crochet a dark border round and round, leaving with colored stripes. In pattern 5544 you will find complete instruction for making the rug shown; an illustration of it and of all stitches needed; material requirements.

To obtain this pattern send 20 cents in stamps or coin (check preferred) to Household Arts Dept., Winnipeg Newspaper Union, 170 McDermott Ave., Winnipeg.

There is no Alice Brooks pattern book published

The Canada Year Book 1936

Deals With Every Phase Of The National Life Of The Dominion. The publication of the 1936 edition of the Canada Year Book is announced by the General Statistics Branch of the Dominion Bureau of Statistics. The Canada Year Book is the official statistical annual of the Dominion and contains a thoroughly up-to-date account of the natural resources of the Dominion and their development, the history of the country, its institutions, its demography, the different branches of production, trade, transportation, finance, education and industry, a comprehensive study within the limits of a single volume of the social and economic conditions of the Dominion. This new edition has been thoroughly revised throughout and includes in all chapters the latest information available up to the date of going to press.

The 1936 Canada Year Book extends to over 1,150 pages, dealing with every phase of the national life and more especially with those susceptible of statistical measurement. Attention may be called to some of the features which are of the present volume. The statistical summary, included in the introductory matter, has been extended this year. A special article, "Canada on Vimy Ridge," prepared by Colonel A. W. D. Duguid, D.S.O., D.C.M., R.C.A., Director of the Historical Section (G.S.), Department of National Defence, has been included in Chapter VII, dealing with the official unveiling of the Vimy Memorial arrangements to take place this month. New material on fertility rates and multiple births in Canada has been added to Chapter VI, so far as statistics are available, the immigration tables of Chapter VI, have been revised on calendar year basis to facilitate international comparison. Statistics covering the construction of the Dominion have been made available in the Bureau recently, and are published for the first time in Chapter XV, amplifying the information on construction awarded and building permits, statistics of which have appeared heretofore in Chapter XVII.

The introduction to the External Trade Chapter (XVI) has been revised by the inclusion of a new table and a new summary of world trade abridged from the League of Nations' "Review of World Trade, 1934." Section 1, dealing with the External Trade Chapter (XVI) has been entirely revised and enlarged to cover the estimates of retail trade made since the 1931 census, a new series of monthly indexes since 1929-30, is also included as well as principal statistics of chain stores and the motion picture industry. Some revision has been considered necessary in Chapter XXI, by the inclusion of new material on a prominent subject of municipal taxation and the estimate of national wealth, 1933, with revised comparable figures for 1929-30. The latest statistics of the Dominion, the peak of domestic prosperity which in 1935-36, the service of the winding down of values resulting from the depression. Several of the statistical chapters in Chapter XXII, have become broken by the creation of the Bureau of Canada, but since it will be some time before other series can be begun on the new basis, a compromise has been temporarily made. Improvement has been effected in the presentation of the financial statistics of the provincially-controlled schools of Canada by the collection of data on individuals receiving the Canada Education Grant from the provinces. These are presented in Chapter XXV, Tables 8 and 9. Chapter XXVI, dealing with the activities of Dominion and of provincial authorities and a brief sketch of the origin and growth of the different classes of institutions in Canada, have been included.

The new Majesty King George V. on Jan. 20, 1936, received with deep sorrow throughout the Empire-wide review of the death and the succession of King Edward VIII. to the Throne, have been appropriately indicated by the reproduction, as frontispiece, of the official proclamation of the Government of Canada, dated Jan. 21, 1936, accompanied by the latest official photographs, obtained through the courtesy of the respective court photographers.

The volume is illustrated by many maps and diagrams and the latest available data are everywhere included.

Owing to the urgent need for economy in the distribution of government publications, it has become necessary to make a charge to all individuals receiving the Canada Year Book. Persons requiring the Year Book may obtain it from the King's Printer, Ottawa, as long as the supply lasts, at the price of \$1.50, which covers merely the cost of paper, printing and binding. By a special concession, ministers of education, bona-fide students and school teachers may obtain paper-bound copies at the nominal price of 50c each.

Compensation For Colonies

South African Defence Minister Urges It For Germany

Oswald Pirow, defence minister for the Union of South Africa, stated at Pretoria, on his return from London, that "there can be no permanent basis for a peaceful agreement unless Germany is given adequate compensation for their colonies."

This meant, he added, in an interview with Reuters, territorial compensation "not anywhere on the face of the globe but in London. I found a lot of support (in London) for the view that Germany's compensation in Africa is vital for the maintenance of white civilization on the continent."

Speaking in the House of Commons, Miss Agnes Macdonald, M.P., said: "I think that any fool can farm. They argue that all a farmer has to do is to scratch the earth and sow some seeds. Actually a successful farmer must be a good administrator. He has to know everything about the work in his business, the cerealist, and a stock breeder. Running a farm is no job for an amateur."

Farming Requires Ability

Speaking in the House of Commons, Miss Agnes Macdonald, M.P., said: "I think that any fool can farm. They argue that all a farmer has to do is to scratch the earth and sow some seeds. Actually a successful farmer must be a good administrator. He has to know everything about the work in his business, the cerealist, and a stock breeder. Running a farm is no job for an amateur."

The work will be under direction of Dr. John Patterson of Toronto, chief of the Dominion meteorological service, department of marine. It is expected observations will produce information adding to the safety of aircraft operation.

SUNDAY SCHOOL LESSON

JULY 26

CHRISTIANITY SPREAD BY PERSECUTION

Golden text: Be thou faithful unto death, and I will give thee the crown of life. Revelation 2:10.

Lesson: Acts 7:54-8:4; 11:19-21; 26:9-11; 1 Peter 4:12-19.

Devotional reading: 1 Peter 1:3-9.

Explanations And Comments

"The Martyr Stephen," Acts 7:54-8:4. Stephen was one of the seven deacons chosen to relieve the apostles of the task of ministering to the poor. Read in Acts 6:8 to 7:58 the story of his successful preaching, his enemies and his arrest, his defense and its effect upon his enemies, his vision, his stoning and death.

"Father into thy hands I commend my spirit," and "Father, forgive them, for they know not what they do." So Stephen called upon the Lord saying, "Lord Jesus, receive my spirit." And he lay not this sin upon them. So Stephen called upon the Lord saying, "Lord Jesus, receive my spirit." And he lay not this sin upon them.

Christianity Spread by Persecution. Acts 8:4-11:19; 26:9-11. "Stephen's martyrdom acted like the first taste of blood on a world that had never known a great persecution arose that day led by Paul, who laid waste the church, entered into every house and dragging out men and women committed them to prison. Compare his own confessions in Acts 26:9-11; 1 Cor. 15:9; Phil. 3:8; 1 Tim. 1:13. He thought then that he was doing right in persecuting Christians, he tells us (read Acts 26:9-11), but that does not change the record of his cruelty."

All except the apostles were driven from Jerusalem by the persecution, and were throughout Judea and Samaria, and as far as Phoenicia and Cyprus and Antioch (Acts 11:19) preaching the word.

Peter's Words About Bearing Persecution, 1 Peter 4:12-16. Beloved, do not be surprised when you receive a fiery trial, for it comes to prove you. Rejoice to be partakers of Christ's sufferings, if it is surrounding you even now, though you cannot see it yet. Blessed are you when reproached for the name of Christ, because God's Spirit (which is the Spirit of glory and the Spirit of God) rests upon you.

Will Work Together

Canada And United States Co-operating In Weather Check

Canada, it was disclosed, will co-operate with the United States in aeroplane observation of the upper air with a view to increasing accuracy of weather forecasts.

Canada flights will be made from Fort Smith, N.W.T., on the Slave river. Planes will carry observers who will work at altitudes of about 17,000 feet.

The work will be under direction of Dr. John Patterson of Toronto, chief of the Dominion meteorological service, department of marine. It is expected observations will produce information adding to the safety of aircraft operation.

Farming Requires Ability

Speaking in the House of Commons, Miss Agnes Macdonald, M.P., said: "I think that any fool can farm. They argue that all a farmer has to do is to scratch the earth and sow some seeds. Actually a successful farmer must be a good administrator. He has to know everything about the work in his business, the cerealist, and a stock breeder. Running a farm is no job for an amateur."

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out two pounds of bile into your bowels daily. If bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas builds up your stomach. You get constipated. Harmful poisons go into the body, and you feel weak, sick and the world looks pink.

A new bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes these good old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up." Harmless and gentle, they make the bile flow freely. They do the work of natural bile but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else, see.

Thou Shalt Not Love

— A NOVEL BY —
GEORGIA GRAIG

CHAPTER I.—Continued

Starr had not realized that her temperamental words had been spoken aloud until the man's voice interrupted. It was a crisp, pleasant voice, with a lazy, amused drawl. She whirled around to face him, hands gripping her handbag tightly as the nearest support.

The man had detached himself from the careless crowd, and stood not far from her elbow, indolently leaning against a corner of the show window frame. He was looking down on her with quizzical gray eyes that held a glint of humor in their depths. For that, first startled moment Starr's complete vision was filled with him. He was tall, handsome in a bronzed, broad-shouldered, slim-waisted way, with a physique that bespoke the owner's pride of its possession in its care. He wore dark, smartly tailored clothes which were unerringly placed in their category of good taste. Money, too, of course. That he was accustomed to that as to the air he breathed was in his slightly arrogant features, features which had just the proper tinge of hardness to give him an air of interesting masterfulness.

The smile of tolerant—or was it condescending?—amusement curved his lips more widely as he looked straight into Starr Ellison's upturned face, from which the eagerness of her passionate plea had not fled.

"So you want to play, do you?" he repeated, with maddeningly slow emphasis.

Starr could not understand why on the instant she was not annoyed at his intrusion, or his very apparent jibing. Such a short time ago the Starr Ellison she had always known would have been about as furious as "Masher" and one look would have been a crushing rebuff to him.

Today it did not matter. Such things were of so small account. Nothing mattered, anyway. Everything was an affair of relativity. Things were important only because of the bearing they had on her future. With barely six months to

live, which could be considered practically no future at all, what did it matter what she might say or do? What anyone else in the world might say or do?

Even though she was surprised at herself, steadily Starr returned the contemplative scrutiny of the gray eyes that were amusingly regarding her. She placed him. Readily. The man before her represented that gay, smart world she had never known, for which she had yearned—the other half of the world which knew how to play. He had taken advantage of the opportunity. He stood for all she had lost in life and could never hope to attain.

She cried out at him suddenly, her eyes blazing at him as though she were, through him, hurting her defy to earth and heavens:

"Yes, if you must have it! More than anything else in this wide, wide world, I want to play!"

The smile in his eyes was tauntingly on his lips as he drawled:

"That, I should imagine, should be something not too hard to arrange."

But, aghast at herself, Starr was backing away, long lashes dropped over her confused eyes. What had she done? Unhinged she backed into a passerby. The gray-eyed man's hand went out to touch her arm.

"Wait a minute," he said. "We ought to talk this over a bit, hadn't we? There's no hurry."

His smile was friendly. "The Arabs, you know, have a saying: 'What is there to hurry for? We are all going the same way. Why should we try to pass one another? Let us enjoy today, for today will never come again.' Of course this isn't Egypt, but—"

He stopped short at the look of blazing fury in the depths of the girl's dark, mysterious eyes. Her voice was a flame at him.

"I hate Egypt!"

Then she was gone, flying up the avenue, losing herself in the crowds, never looking back. Michael Fairbourne stood staring after her. Then he grinned and shrugged as he lighted a cigarette and moved carelessly along the street.

"Seem to have dubbed my shot again, eh?" he murmured. Then he glanced along the street as if again seeing the black-eyed girl with the camel's skin. "Still, I'm wondering a little—"

CHAPTER II.

There was no good reason for Starr Ellison to be on Fifth Avenue that cheerful early Autumn mid-day. Only that it was not Sixth Avenue. Nor was there along it any employment office, wordlessly insisting on her need for job hunting in the seriousness.

After her visit to the doctor, with whose smiling advice she had, incidentally, left the greater part of her small remaining store of cash—for the privilege of being told she had only six months more of life—such small and distasteful matters as searching for a job appeared of small moment. Especially when there were no jobs. Why keep on hunting for one by which she could merely keep the breath of life in her body for six months more? It hardly seemed worth while.

Such thoughts were in Starr's mind as she fled along the street after her tempestuously uttered rebellion against Fate in the atmosphere of the prosperous Avenue. Nevertheless, she mechanically turned at the next corner and sought the street made clamorous by the din overhead, and headed for the agencies which were on her list and not already tried that day. She couldn't be a quitter entirely, she supposed, even if she had so short a time to fight. Work was most necessary at the moment. Vitally so, for she had a most distasteful memory of her seance that morning with the keeper of her rooming house. A dreary, hopeless kind of place it was, but Mrs. Maloney who kept it, had made it quite plain to Miss Ellison that she had waited for her rent quite long enough, and that while she was right sorry that Miss Ellison couldn't get a job, there were plenty of other people in the same fix. After all, Mrs. Maloney's was not an eleemosynary institution. In other words, Mrs. Maloney had conveyed to Starr that if she was prepared to pay her three weeks' arrears of rent that she could have her clothes. Otherwise—

None too pleasant a prospect, and it was beginning to look like a rough ride ahead for a girl who, at most, had in her purse only enough for lodging for a night or two somewhere—without baggage. Even if she were going to pass out in six months, in the meantime, she supposed, she would have to sleep somewhere.

A wry smile crossed Starr Ellison's lips as she rushed along. She—who didn't know where she was going to sleep that night, had been wasting her time on Fifth Avenue, rebelling against not hav-

ing a taste of life. She had been wanting to play!

She didn't know that noon had come, and forgot that her breakfast had been a doughnut and a cup of coffee until she suddenly realized that the crowds who were jostling her, elbowing her, were making their way into the rows of eating places that sat cheek by jowl along the cross street. She stopped still before one of them, drawn irresistibly by the sight of the good things to eat temptingly displayed. Another show window!

She forgot that she was hurrying to look for a job, forgot she had wanted to play, forgot even for that minute what that doctor had told her, as her eyes widened at sight of the food, and then swept on further to the people at the tables. In her eyes was an expression of looking upon some amazingly absorbing scene, but it was no more upon which she gazed than the vista of food and warmth that spread out in one of those restaurants which not so long ago Starr Ellison would not have bothered to give a passing glance.

Two prosperous looking business girls were having their luncheon near the window—a substantial meal, with a steak that was simply cooing butter gravy, new peas and the crispest looking salad.

(To Be Continued)

Chicken Sorters

Japanese Experts Can Determine Sex Of Day Old Chicks

Although only 24 years old, Shogo Uryu is one of Japan's accredited chick-sexers, of whom there are said to be only 20 in all the world, six being now employed in Canada.

During fulfillment of his three-month contract at Edmonton, he determined the sex of 150,000 day-old chicks.

So proficient is he that he can sort out the little birds at the rate of 1,000 an hour.

Probably the outstanding feature of this remarkable work as practiced commercially by the Japanese experts in the Dominion, is the fact that they can guarantee their results 97 per cent. Mr. Uryu claims white students of the art have not yet been able to attain proficiency equalling this.

He explains it required five years study under the leading Japanese experts before he was "ready" to sell his services.

Poultrymen find this science beneficial in that they can eliminate cockerels from among baby chicks if desired, raising only the best pullets.

Work Faster Than Men

Monkeys Trained To Pick Coconuts In British Malaya

Monkeys are displacing men as coconut-pickers on plantations in Kelantan, British Malaya.

Trained monkeys, of a variety known as "broks", can pick nuts as fast as 1,000 a day. This greatly exceeds the output of a man.

A Malay keeper at the foot of a coconut palm sends the brok up the tall trunk, with a thin rope tied round the animal's waist. If the monkey attempts to pick a nut that looks too green, the rope is given one tug. When the monkey is wanted to come down to reap the nuts on another palm, the Malay gives the rope two tugs.

The broks are brought from Singapore, the centre of the animal trade in Malaya. Their training requires great patience and they are first taught to pick up nuts from the ground.

A trained brok is of great value to an owner. He is let out on contract to covey estates at profitable rates and the cost of feeding him each day is practically nothing.

Likes Canadian Kitchens

England Behind In That Respect States Woman From Wales

Kitchens of Canada and the United States have been a revelation to many countrywomen from across the seas. Mrs. Frank Gresham, of Wales, a delegate to the recent convention in Washington of the Associated Country Women of the World, commented as she passed through Montreal en route for her home.

Mrs. Gresham said that in English kitchens old pans and old ways were too prevalent, while kitchen planning was still too much "an idea only." "It is nonsense to say we have nothing to learn from other countries," she remarked.

"How would you like your egg served, sir?"

"Is there any difference in price?"

"None whatever, sir."

"Then serve it on a thick slice of ham."

The French were the first to use airplanes extensively.

His Majesty's Portrait FREE

THE makers of Bee Hive Golden Corn Syrup and Durham Corn Starch are happy to offer to their friends throughout Canada a handsome two tone reproduction of His Majesty, King Edward VIII. The portrait, (by Bassano) is one of the most recent and has been specifically designed for framing, measuring approximately 9" by 11". It is restrained and dignified and when framed will blend in perfect taste with the furnishings of the finest room. Many well deserved compliments have been received on the beautiful appearance of this portrait.

ST. LAWRENCE STARCH CO. LTD.

How to Secure Free Portrait

Send in one Bee Hive Golden Corn Syrup label and one Durham Corn Starch label with your name and address written clearly on the back of either label, along with the words—"King's Picture." Mail to The Lawrence Starch Co. Limited, Dept. 8, Fort Credit, Ontario and your free portrait will be forwarded promptly.

K306

The Big Nickel

Looms Large On The Collection Plate, And Is As Common As Sin

"One of the hardest things the church has to face is the big silver nickel," Rt. Rev. John Lyons, lord bishop of Ontario, said at the unveiling of a tablet in St. James Memorial hall at Joyceville, near Kingston, Ont.

"The big nickel is as widespread and as common as sin itself," he said. "It is often a matter of wonder to me how people manage to collect so many. People contribute adequately without complaint to amusement. Probably if these people fully realized the problems of the church, they would be of greater assistance."

Native Shrubbery

The scarlet fruit of the silver buffalo-berry tree imparts a gay touch to the prairie farms where the tree is used in the surrounding shrubbery. It is a native of the prairies and is found in hills and along streams from the Pembina mountains in Manitoba to the Bow river in the Rocky Mountains. In the Manitoba hills the tree grows to a height of 18 feet. It is generally armed with thorns.

Removing Old Arch

The Arch of Triumph, built by Alexander I. to celebrate Napoleon's retreat from Moscow, is to be razed to make way for traffic. The arch, more than 100 years old, stands on Gorky street, near the White Russian Railway Station, point of arrival and departure of tourist trains.

Horseback Trail

Will Be 2,300 Miles Long, Extending From Canada To Mexico

Plans for a horseback Pacific coast trail, extending from Canada to Mexico, have been announced by the National Park Service.

It will be 2,300 miles in length and will be continuous on all the higher mountain trails on the coast. It also will connect all intervening national parks.

Nearly all of the work is to be done by the CCC and the trail is expected to be completed this year. Metal signs will mark the entire route for the benefit of horseback riders or hikers.

Large Number In West

Many Ontario Born People On Prairies And At Coast

Out of about 2,800,000 people in Canada who were born in Ontario, nearly 2,500,000 are still in this province, 3,500 in the maritimes, 35,000 in Quebec, and 237,000 in the Canadian West, including British Columbia. These are census figures, but conditions to-day are probably very different. Compared with Ontario's contribution of 65,000 to Quebec, about 92,500 Quebec-born inhabit Ontario—Toronto Star.

Bamboo Tree Grows In B.C.

Basil Keys, British Columbia horticulturist, is creating a tropical paradise. Seeking to prove that his theory that bamboo trees can grow in Canada, Keys completely surrounded his home with a half-score varieties of the tropical trees. The trees were flourishing.

Little Helps For This Week

That good thing which was committed to thee, keep by the Holy Ghost which dwelleth in us. 2 Timothy 1:14.

Oh! that the Comforter would come, Nor visit as a transient guest, But fix in His constant home, And keep possession of my breast. And make my soul His loved abode. The temple of indwelling God.

The real progress of your soul in the divine life is a tender plant. It requires stillness, meekness, and the unity of the heart totally given up to the unknown workings of the Spirit of God, which will do all its work in the calm soul that has no hunger or desire but to escape out of the mire of its earthly life into a life with God. It is not wise to try to an eagerness of many things which although they seem innocent will divide and weaken the workings of the divine life within you.

Smoke deprives London of 300 hours' sunshine every year.

Sea lions in the London zoo are fed 40 pounds of fish every day.

ITCHING
TORTURE STOPPED IN 5 MINUTES!
For quick relief from the itching of pimples, blotches, eczema, athlete's foot, rashes and other skin eruptions, apply Dr. D.D.B. Itching Lotion. Liquid B.B. D. D. Prescription. Its gentle oils soothe the irritated skin. Cleans, soothes and soothes—dries fast. Stops the most intense itching instantly. A 35¢ trial bottle proves it—or money back. Recommended at drug stores for forty years. Ask for D.D.B. Prescription.

Local News

Mrs. Walter Williams and two daughters are spending a holiday at Nelson, B.C.

Mr. K. Apponen and son Billy are visiting in Calgary with Mr. and Mrs. Shaw.

Mr. Joe Emmerson has been busily engaged in making a lawn, which with plenty of water and warm weather has made rapid progress. Another home which has been greatly improved is that of Steve Krzwzy, whose lawn and trees have added greatly to the appearance of his home.

Mr. and Mrs. James Ford spent the week-end visiting their daughter, Mrs. A. L. Watkins, and husband, at High River. Mr. Ford states that the dust on the highway between here and Cowley is a serious menace to traffic, far worse than other parts of the highway where travel is not so heavy.

A rim and a spare tire was stolen from a garage owned by W. Lonsbury. The garage was located on the school property behind the house formerly owned by G. R. Powell, and purchased by the school board. Mr. Lonsbury has since moved the garage to his own property, on Second street.

H. G. Charman, representative of Confederation Life Assurance Co., who has been spending some time in the Peace towns and holidaying with his family at Crow's Nest Lake, has qualified for a trip to Jasper Park, where a convention of company representatives will be held, Aug. 3 to 7.

Refrigeration in homes will eventually become general, the same as electric light and other modern conveniences. It is being rapidly extended to homes and railway trains. You may enjoy the comforts and economies of electric refrigeration by purchasing refrigerators from Coleman dealers who have several up-to-date types for sale.

William Lees suffered a sun-stroke on Sunday which laid him low. He stood talking to his neighbor, George Morgan, and neglecting to cover his head, the powerful rays of the sun quickly affected him, so that he had to remain in bed for a couple of days. He will have to take it easy for a week or two to recover from the effects. You may be able to go without a vest, or even a shirt, this hot weather, but it isn't safe to go out without a hat.

FOR SALE—3 roomed house in Granton. Good location. Apply Mike Diagios or Journal office.

PALACE THEATRE NOTES

Thursday and Friday this week at the Palace a double program will be given, including Carl Brisson and Arline Judge in "Ship Cafe," and Herbert Marshall in "Till We Meet Again". On Saturday and Monday the feature picture will be Jean Arthur and William Powell in "The Ex-Mrs. Bradford." This will be the most enjoyable 82 minutes you ever spent in a playhouse.

If it is advertised in The Journal it must be O.K.

ST. ALBAN'S CHURCH NOTES

Celebration of Holy Communion on Sunday, July 26, at 11.15 a.m.

During August, services will be discontinued, as Rev. and Mrs. A. S. Partington and daughters will be leaving for Vancouver for their vacation.

THE SALVATION ARMY

Regular services will be held at the Salvation Army next Sunday, 10.30 a.m. Directory class, 3 p.m. Sunday school, 7.30 p.m. Salvation service, to which all are heartily welcomed. Young People's meeting every Friday at 7.30 p.m. Meetings of the Ladies Home League will be resumed next Tuesday at 7.30 p.m. in the Salvation hall.

IN MEMORIAM

IN LOVING MEMORY of Joseph Fox Bell (Joc) who passed over July 19, 1932.

I have lost my dearest companion

A life linked with my own

Every day I miss him more

As I walk through life alone.

Sadly missed by his loving wife and family at Coleman and Merced.
